Built environment - Wikipedia
In urban planning, architecture and civil engineering, the term built environment, or built world, refers to the human-made environment that provides the setting for human activity, including homes, buildings, zoning, streets, sidewalks, open spaces, transportation options, and more. It is defined as "the human-made space in which people live, work and recreate on a day-to-day basis."

Evidence on the impact of sustained exposure to air
Aug 06, 2013 · This paper's findings suggest that an arbitrary Chinese policy that greatly increases total suspended particulates (TSPs) air pollution is causing the 500 million residents of Northern China to lose more than 2.5 billion life years of life expectancy. The quasi-experimental empirical approach is based on China’s Huai River policy, which provided free winter heating via the provision of coal.

Millennium Ecosystem Assessment
About the Millennium Assessment. The Millennium Ecosystem Assessment assessed the consequences of ecosystem change for human well-being. From 2001 to 2005, the MA involved the work of more than 1,360 experts worldwide.

Water | BHP
We produced our inaugural Water Report in FY2018 to highlight our efforts to improve stewardship of water resources and reflect water’s importance.
Environmental Ethics (Stanford Encyclopedia of Philosophy)
remains strong, but we have chosen to integrate our water reporting within
the disclosure of the broader aspects of our sustainability (e.g. health,
safety, climate change).
